#1

Hi Ken.

How's everything over at SOS?

We can do this, however we need to do a few things first:

- 1) Create a secure FTP site for you to send the file (can't send sensitive material via email)
  - 1a. Need to work with your IT staff to set up the site on our side - please send contact information
  - 1b. I need to work with our IT staff to open up firewall and create sFtp site
- 2) Have you send file to our site
- 3) Run your file against our database

There is a charge with SSA, but I'm not sure what it is. I think that it's .02 or .03 per transaction, but my fee is where it starts to get expensive (just kidding). I'll check with MVD about the SSA charges and how we can send a bulk file to SSA.

Is this a "one-time" deal or how often will we be running this?

Take care.

Lee

Subject: Voter file

Hi Lee,

I just left you a voice mail where the Gov's office and the SOS would like to authenticate voter registration information with MVD.

The idea is that the SOS office would send to TRD the voter registration file including name, DOB, SSN and address. We would like for TRD to run the file against MVD records to see if name, DOB and SSN matches against the MVD files.

Those voter records that do match would than be put in one file called "Voter Files Authenticated". The remainder of files that did not match would then be placed in a separate file which TRD would then send to SSA to verify with SSA as a batch process.

One unknown on our end is that when we send the unmatched files to SSA, is there a charge from SSA? If so, do you know the charge?

I am in committee this morning and cannot chat but can correspond via email.

We have a file ready to send to you but we need to know what type of file and how to get it to you.

We have a file ready to send to you but we need to know what type of file and how to get it to you.

For approval from your end, I do know that the Secretary of State spoke to Secretary Padilla and she said she will do this...I hope this helps.

Thanks for your help.  
Ken

Hi Ken,

327 Possible matches that I thought is the approximate count. There are duplicates in 327 matches. On Saturday again we verified and we found that there are only 167 Matches.

#4

Please let us know if any questions.

Thanks  
Venkat.

**Subject:** SOS data matching against Foreign National Data

Hi Venkata,

Last week you compared SOS data that was not matching the MVD file against the Foreign National File. On this match against the Foreign National file you compared First Name, Year of Birth and Zip Code and came up with 327 possible matches. Do you have the data on this match and if so can you please send me both the SOS data (Name, Year of Birth and Zip Code) along with the 327 possible matches from the MVD file (Name, Year of Birth and Zip Code)?

Thank you and please feel free to call if you have any questions (239-5022).

Thanks,  
Ken

**Subject:** SSA - Checks Remaining

As of 03/25/2011 **8,529** number of socials remaining for checking with SSA administration. In addition another 5000 socials returned with "System Error", hence we will resend these **5,000** "Socials with System Error" for SSA check again. We expect, the SSA check job will be completed by 03/28/2011 .

Please let me know if you need any further information

Ken,

The above document contains the Stats from the data provided by SOS today. It comes to 197857 records are not matching with our SSNData. We will compare this 197857 against Foreign National's on Monday and get back to you.

Please let me know if you have any questions.

Thanks  
Rao chad

Ken,  
Here are the results for the file that you want us to run first.

Definitions for Results:

**1 - SSN, Name, and DOB verified - no death record exists.**

**2 - Invalid SSN**

**3 - Name did not verify, DOB is valid**

**4 - DOB did not verify, Name is valid**

**5 - Name and DOB did not verify**

**6 - SSN, Name, and DOB verified - death record exists**

**7 - SSN did not verify, other reason**

**9 - System Not Available**

**SS - Original SS Message will return**

As of 7:20 this morning, we had completed 22,000 records of the file containing approximately 164,000 records.

Thanks,  
lee

Ken,  
Just checking to make sure that the initial file that we sent you was good. Please let me know.

Also, there are two issues that have come up:

- The results that are returned as "11"
  - We're looking into this. We think we may have an answer, but we're in the process of verifying
- The results that are returned as "9"
  - This means that there was a System Error.
  - We will re-run all records with a return code of 9 as a separated batch

Please let me know that the data is acceptable and this is what you were looking for. We're continuing to run 24 hours-a-day and I just want to make sure we're providing you with the data you need.

Thanks,  
lee
